ALL ABOUT

SOLID SURFACE

Interior projects comprise of Solid Surface material being a part of it.

Moreover, nine in 10 buildings will have some kind of solid surface finishing in it.

"Solid Surface is a product not many interior designers can ignore."

Abhilash Nair

The main reason for this being its high quality finish which comes packed with a series of easy to maintain features and durability.

Installation material in Airports

Installation material in Hotels and Restaurants

Installation material in Hospitals

You get to choose from a wide range of finish options and that too in the colour choice best suited to give the final BEAUTY touch to your dream interior.

A myth or rumour floating around Solid Surface is the non-repairability of handed over products which is absolutely wrong. You get the right team, and Solid Surfaces are easily repairable.
